Finding Aids Documentation
Theming and Contact Information for Finding Aids

This documentation describes how theming for the archival repositories is incorporated into the published finding aids.

[BRANDING](#)
[CONTACT INFORMATION](#)
[SUBMIT CHANGES](#)

BRANDING

Branding inclusive of color, logo, contact information and custom footer links are defined for each of the archival repositories within the finding aids publisher code.

Branding is applied to an individual finding aid by uploading an EAD to the appropriate archival repository selection in the ead publisher tool.

Akkasah
University Archives*
Center for Brooklyn History**
Fales
NYHS
NYU Abu Dhabi
Poly Archives
Villa La Pietra

* EADs for RISM are uploaded to the University Archives repository. There is additional branding and contact information for the RISM materials that is applied based on the EAD-id.

** There are three archival repositories in use at Center for Brooklyn History. All three share branding and contact information. All EADs are uploaded to the Center for Brooklyn History option.

CONTACT INFORMATION

Contact information is stored for each archival repository as part of its theme.
The following is an example of the data stored.

```
address:
addressline:
value:128 Pierrepont Street
value:Brooklyn, NY 11201
color1:#3c5caa,
contact_for_viewing:cbhreference@bklynlibrary.org
name:Center for Brooklyn History
repo_id:cbh
```

```
sidebarlogo:cbh.gif
logo-display-width-not-used-here:180px
url:https://bklynlibrary.org/cbh,
footerlinks:
value:Rights & Reproductions
url:https://www.bklynlibrary.org/cbh/collections/reproductions
value:NYU Digital Accessibility Policy
url:https://www.nyu.edu/footer/accessibility.html
```

SUBMIT CHANGES

For updates to any of these elements, please contact the NYU Libraries Digital Library Technology Services team, dlts *at* nyu.edu.

It is also possible for those familiar with Github to submit a pull request with changes to the following Github repository, https://github.com/nyudlts/findingaids-hugo-v4/tree/main/themes.

The branding and contact information is stored in this location: themes/REPOSITORY/data/repositories.json.

Note that additions or changes will need to adhere to the json syntax for the file.
